

Istituto Comprensivo di Torrile

Scuole dell'infanzia, primaria e secondaria di primo grado del Comune di Torrile

Dear Parents,

We inform you that the Ministry issued a ministerial ordinance n.172 on 4-12-2020 which eliminates the formulation of the numerical marks (from 0 to 10) and replaces it with a descriptive judgment. Therefore, in the evaluation document of your child you will no longer find the "marks", but the levels reached in relation to the objectives of each subject.

The judgment expressed makes it possible to best describe, for each student, the progress, strengths and skills to be developed.

This assessment is formative and tells what children can do.

The levels provided for by the ministerial order are 4.

A) Advanced

B) Intermediate

C) Base

D) In the process of first acquisition

These levels are defined on the basis of surveys and direct observations of teachers regarding the criteria of autonomy, continuity and use of resources in different learning situations.

For pupils with disabilities, descriptive judgments will be consistent with the objectives of the Individualized Educational Plan. For pupils with Specific Learning Disabilities or Special Educational Needs, the Personalized Teaching Plan will be taken into account.

The new evaluation document will be presented with:

- the learning objectives of each subject
- the level reached
- the summary descriptive judgment
